MUKUL BARHATE

Python Developer | AI/ML & Full-Stack

Pune, Maharashtra, India | +91 8626068010 | mukulbarhate09@gmail.com

linkedin.com/in/mukul-barhate-23857139b | github.com/mukul135

PROFESSIONAL SUMMARY

Final-year Computer Engineering diploma student (95.60%) who builds full-stack AI/ML applications with Python, Flask and Android. Hands-on with OCR, NLP, machine learning and computer vision through three end-to-end projects. Seeking a Python / AI-ML developer internship or entry-level role.

TECHNICAL SKILLS

Languages: Python, Java, C++, C, SQL, HTML5, CSS3

Frameworks & APIs: Flask, Jinja2, Android (Java/XML), REST APIs

AI / ML & Computer Vision: scikit-learn, spaCy (NLP), OpenCV, MediaPipe, YOLOv8, Tesseract OCR, Hugging Face, Gemini API, Prompt Engineering

Databases & Cloud: MySQL, Oracle, Firebase (Firestore, Auth)

Tools: Git, GitHub

Core Concepts: Machine Learning, Computer Vision, Natural Language Processing, OCR, REST API Development, Object-Oriented Programming

PROJECTS

MediSuite AI Agent | Python, Flask, MySQL, Tesseract OCR, spaCy, scikit-learn

- AI healthcare insurance platform that takes a scanned bill to a fraud-checked claim decision through a 9-phase pipeline: OCR, autofill, NLP, verification, prediction and summarization.
- Built OCR autofill (regex + fuzzy matching), a Logistic Regression approval model (92% accuracy, 98.4% ROC-AUC) and Isolation Forest + rule-based fraud detection.
- Added a BART/T5 report summarizer with offline fallback, secure login and MySQL claim history. github.com/mukul135/MediSuite-AI-Agent

RoadGuard - AI Pothole Detection & Rewards | React, TypeScript, Flask, YOLOv8, Firebase *Team of 3*

- Civic-tech platform where citizens upload pothole photos, YOLOv8 estimates severity, and admins review reports on map and analytics dashboards.
- Built React 19 + TypeScript citizen and admin portals with Leaflet maps, Chart.js analytics and a points, badges and leaderboard system.
- Flask API with duplicate detection, suspicious-report queue and rate limiting; Firebase Auth with Firestore/Storage security rules; Dockerized backend. github.com/ishanagnihotri2009-a11y/RoadGuard

Outfit Studio - AI Personal Styling App | Android (Java/XML), Flask, MySQL, OpenCV, MediaPipe *Team Capstone*

- Android app that analyzes face shape, skin tone and body type from a photo and recommends outfits from the user's own wardrobe.
- Flask REST backend with JWT auth and MySQL; outfit generator using color, occasion and weather rules with Fashion Score ranking.
- Features: AI Complete the Look, closet statistics, weekly planner, shopping assistant and 2D virtual try-on. github.com/bhaveshc21/NEW-Outfit-Studio-

EDUCATION

Diploma in Computer Engineering (Final Year) 2024 - 2027

Government Polytechnic, Pune | Percentage: 95.60%

10th (Secondary School) 2024

D.I.C.'s English Medium School | Percentage: 95.60%

CERTIFICATIONS

- **Learn Java Programming: Beginner to Master** - Udemy (2026)
- **Foundations of Prompt Engineering** - AWS Training & Certification (2026)
- **SQL and Relational Databases 101** - IBM Skills Network / Cognitive Class (2026)
- **Artificial Intelligence Fundamentals** - IBM SkillsBuild (2026)
- **Complete Python Bootcamp: Learn Python from Scratch** - Udemy (2025)
- **Claude 101** - Anthropic (2026)

LANGUAGES

English (Fluent) | Hindi (Native) | Marathi (Native)
