PROFESSIONAL SUMMARY

Final-year Computer Engineering diploma student at Government Polytechnic, Pune, with a 95.60% academic score. I enjoy building practical applications with Python, Flask, databases, OCR, NLP and computer vision, and I am looking for an internship or entry-level role where I can keep learning and contribute to real projects.

TECHNICAL SKILLS

Programming	Python, Java, C, C++, SQL, HTML5, CSS3
Backend & App	Flask, REST APIs, Jinja2, Android (Java/XML)
AI/ML & Vision	scikit-learn, spaCy, OpenCV, MediaPipe, YOLOv8, Tesseract OCR, Hugging Face, Gemini API
Databases & Tools	MySQL, Oracle, Firebase (Firestore/Auth), Git, GitHub

SELECTED PROJECTS

MediSuite AI Agent

Python • Flask • MySQL • Tesseract OCR • spaCy • scikit-learn

- Built an insurance-claim workflow that extracts details from scanned documents using OCR and processes claims through a multi-stage review.
- Trained a Logistic Regression claim model (92% accuracy, 98.4% ROC-AUC) with fraud checks, secure login, claim history and report summarization.

RoadGuard – AI Pothole Detection & Rewards

Team project

Flask • Python • YOLOv8 • Firebase • Docker • React/TypeScript

- Built Flask REST API endpoints for pothole reports, duplicate checks, suspicious-report review and request rate limiting.
- Connected Firebase Authentication and security rules, and helped containerize the app with Docker.
  github.com/ishanagnihotri2009-a11y/RoadGuard

Outfit Studio – AI Personal Styling App

Team capstone

Android (Java/XML) • Flask REST API • MySQL • Gemini API

- Developed JWT-secured registration and login, selfie-based skin-tone analysis and personalized color palettes.
- Added an AI digital wardrobe, occasion-based outfit generation with compatibility scores, weather-aware suggestions and 2D virtual try-on.
